

Guardian®

Compact Wet/Dry Ten-print Livescan with User Interface

BENEFITS

- Intuitive instructions via integrated, touch-screen display
- On-device workflow control by touch screen
- Superior wet and dry print capture
- Intelligent capture mode ensures quality images
- Rapid auto capture improves efficiency

PRODUCT DESCRIPTION

Crossmatch™ continues to set the global standard for reliable, high volume ten-print scanning. The next generation Guardian builds off the Crossmatch commitment to innovative, quality solutions. Every detail has been considered to achieve the simplest, fastest, and most secure fingerprint capture process.

Applicants are guided by clear, interactive instructions displayed on a user-friendly touch screen. And because every applicant is unique, the Guardian seamlessly captures quality images, accurately and rapidly, from both wet and dry fingers without the need to recalibrate. These features not only improve the applicant experience, but free the operator to focus on other critical screening tasks.

Ideally suited for border control, national ID, and other expedited, high volume processing applications, the Guardian delivers enhanced security, proven reliability, and a reduced total cost of ownership.

ABOUT CROSSMATCH

Crossmatch helps organizations solve their identity management challenges through biometrics. We empower governments, law enforcement agencies, banks, retailers and other enterprises to mitigate risk, drive productivity and improve service levels. Our solutions are built on consultative expertise, refined best practices and the application of advanced biometrics technologies. Crossmatch understands the forces of change in the markets we serve and we develop solutions that anticipate customer requirements. Our network of consultative and technical service experts collaborate with customers in more than 80 countries worldwide.
