PRODUCT DESCRIPTION

The Crossmatch™ Verifier 310 LC is a unique forensic-quality two fingerprint capture device. The scanner delivers accurate and reliable results for identification, verification and enrollment programs. Compared to a single-finger scan, a Verifier 310 LC image provides enhanced accuracy for identification and verification purposes—while reducing the time necessary to obtain a full enrollment.

The scalable system responds to increased demand for quick and accurate fingerprint capture, making it an excellent choice for low and high volume deployments. For added flexibility, the system can be coupled with the Crossmatch Enterprise Matching Server, which enables rapid fingerprint verification.

Available with USB 2.0 connectivity, large heated platen and enhanced ambient light rejection, the compact scanner is ready for integration into most biometrically-enabled security installations.
